Professional Experience

Data Engineer, Grupo Qaracter Consulting - Madrid, Spain

Jun 2025 - Present

- Project for **Oracle Life Services US**: Developed full E2E ETL project in 2 weeks with Agentic AI (Claude Code), deployed in **Azure**. Automatic process receives daily extracts of health studies from Oracle's vendor and sends transformed report to selected users based on access privileges (with or without Personal Information).
- Ongoing project at **BBVA**: Designed the **Data Model** of a web product for *Global Transactional Banking*, considering AS IS and TO BE integrations with Salesforce and other banking systems. Defined and developed **ETLs within GCP** - Google Cloud Platform (Oracle DB to BigQuery, Google Scripts/Sheets, Data/Looker Studio).
- Part-time **managing position**: supervising 9 consultants and responsible for the Data solutions consulting service of **€600K in annual revenue**. Authored technical proposals for public-sector tenders, meeting strict compliance/eligibility criteria and securing new client contracts in Mexico and Spain.

Senior Business Intelligence Developer, BNP Paribas (Via Grupo Qaracter) - Madrid, Spain

Aug 2023 - May 2025

- **Reduced by 65% the processing time** of a critical data pipeline by removing the creation of intermediary data outputs by creating bridges between applications, enabling parallelization, indexing and cleaning the code/joins.
- **Administered Alteryx, Tableau and PowerBI server environments**. Developed multiple projects that integrated Data Engineering and Data Analytics tools within CIB (Corporate & Investment Banking).
- Led multidisciplinary, multicultural teams through **agile delivery cycles**, implementing CI/CD to streamline delivery and ensure alignment between technical execution, functional requirements and project quality/performance expectations.

Business Intelligence Developer, BNP Paribas (Via Grupo Qaracter) - Madrid, Spain

Jun 2022 - Jul 2023

- Built **Balance Sheet & P&L Dashboards for the Country CFO office, with average of 2K quarterly views**. Presented roadmap and usage statistics to C-level audience. Handled high complexity: multiple data source connections, high refresh rates for user comments, row-level security, and sensitive data governance.

Data Analyst, Aker Solutions - Curitiba, Brazil

Aug 2018 - Apr 2021

- **Created a process to control and communicate supplier's delivery delays**, providing analytics apps that enabled buyers and quality engineers to efficiently negotiate and **recover more than R\$6M of financial impacts**.
- **Led IT Continuous Improvement** for the Supply Chain Department under the 'Digital Journey' program, applying Six Sigma/DMAIC methodology in collaboration with IT — achieving over **R\$2M in cost savings by April 2021**.
- **Built a KPI cockpit** for Procurement & Logistics (OTIF Lead time, Spend, Inventory Turnover) from SAP data.

Education

PUCPR - Pontificia Universidade Católica do Paraná (Top 2% in LATAM) - Curitiba, Brazil

2018

Bachelor of **Industrial Engineering**

Halmstad University - Halmstad, Sweden

2016

Computer Networks – Academic Exchange Year

Selected for Science without Borders, a full scholarship from the Brazilian Federal Government.

ID Digital School - Madrid, Spain

2021

Data Science Bootcamp (432 hours)

Built an NLP/ML-based Job Recommender System, ranking 18K+ scraped EU job listings by fit and location quality metrics (cost of living, climate, job density).
