EXPERIENCE — nine years across banking, industrial and public-sector analytics

Data Engineer

Jun 2025 — Present

Grupo Qaracter Consulting — Madrid, Spain

- Project for Oracle Life Services US: developed a full E2E ETL project in two weeks with agentic AI (Claude Code), deployed on Azure — an automated process that receives daily extracts of health studies from Oracle's vendor and sends transformed reports to selected users based on access privileges, with or without personal information.
- Ongoing project at BBVA: designed the data model for a Global Transactional Banking web product, covering AS-IS and TO-BE integrations with Salesforce and other banking systems; defined and developed ETLs within GCP (Oracle DB to BigQuery, Google Scripts/Sheets, Looker Studio).
- Part-time managing position: supervising **9 consultants** and responsible for the data solutions consulting service, worth **€600K** in annual revenue. Authored technical proposals for public-sector tenders, securing new client contracts in Mexico and Spain.

Senior Business Intelligence Developer

Aug 2023 — May 2025

BNP Paribas (via Grupo Qaracter) — Madrid, Spain

- Cut processing time of a critical data pipeline by **65%** by removing intermediary data outputs, building bridges between applications, enabling parallelization, indexing and cleaning the code and joins.
- Administered Alteryx, Tableau and Power BI server environments across Corporate & Investment Banking (CIB), integrating Data Engineering and Data Analytics tools.
- Led multidisciplinary, multicultural teams through agile delivery cycles, implementing CI/CD to align technical execution, functional requirements and quality expectations.

Business Intelligence Developer

Jun 2022 — Jul 2023

BNP Paribas (via Grupo Qaracter) — Madrid, Spain

- Built Balance Sheet & P&L dashboards for the Country CFO office, averaging 2,000 quarterly views, and presented roadmap and usage statistics to a C-level audience.
- Handled high-complexity requirements: multiple data source connections, high refresh rates for user comments, row-level security and sensitive data governance.

Data Analyst

Aug 2018 — Apr 2021

Aker Solutions — Curitiba, Brazil

- Built a process to control and communicate supplier delivery delays, giving buyers and quality engineers analytics apps to negotiate and recover more than **R\$6M** in financial impact.
- Led IT Continuous Improvement for the Supply Chain Department under the 'Digital Journey' program, applying Six Sigma/DMAIC with IT — achieving over **R\$2M** in cost savings by April 2021.
- Built a KPI cockpit for Procurement & Logistics (OTIF, lead time, spend, inventory turnover) from SAP data.

EDUCATION

Data Science Bootcamp <i>ID Digital School, Madrid, Spain — 432 hours</i> - Built an NLP/ML job-recommender system ranking 18K+ scraped EU job listings.	2021
B.Eng. Industrial Engineering <i>PUCPR, Curitiba, Brazil</i> - Top 2% in LATAM.	2018
Computer Networks, Exchange Year <i>Halmstad University, Sweden</i> - Science without Borders scholarship, Brazilian Federal Government.	2016

SKILLS

Professional	SQL, BigQuery, Alteryx, Tableau, Power BI, Data Studio, Looker, QuickSight, Python, Cloud (AWS, Azure, GCP), Databricks, Snowflake, Git, Spark, dbt, Data Factory, MS Fabric, PowerShell, Linux, AI-agentic dev (Claude Code, Devin, GitHub Actions, SonarQube, Jira integration, Rovo)
Other	Docker, Jenkins, JavaScript, R, MongoDB, Hadoop, database administration
Languages	Portuguese (native), English (fluent), Spanish (fluent)
